

What is MBOX file?

MBOX is a file format which contains various mail items like Email, Contacts, Calendar entries, Notes, Journals etc of the mailbox. Various email clients like Thunderbird, Entourage, Pocomail, AppleMail, Eudora, Sparrow, Spicebird etc stores files in MBOX format. MBOX file is a long plain text file where emails are stored as strings, starting with their 'FROM' header.

Default Location of MBOX File

The default location of MBOX file is **"/User/Library/Mail/Mailboxes/directory"**. The default location of MBOX file also depends on the email client. So this location may change for other mail clients.

- **Apple Mail** /User/Library/Mail/[account]/INBOX.mbox/Messages/
- **Mozilla Thunderbird** C:\Users\\AppData\Roaming\Thunderbird\Profiles\
- **Entourage 2008** C:/Users/user_name/Documents/Microsoft User Data/Office 2008 Identities/Main Identity
- **Thebat** C:\Users\AppData\Roaming\The Bat\Mail\profile folder
